SUMMARY

I am a Software Engineer with a strong background in general web development. My approach to work is characterized by a collaborative, positive, and highly organized mindset. I am committed to my professional and personal growth and the success of the projects in which I collaborate. In recent years, I have worked as a Fullstack Engineer, using technologies such as *HTML*, *CSS*, *Javascript*, *React*, *ASP.NET C#*, *Git*, databases, etc.

EDUCATION

Tecnológico de Costa Rica, Costa Rica - *Bachelor of Computing Engineering*

2013 - 2019

EXPERIENCE 7+ years

Ibylit (*SaaS B2B startup fintech*) - *Fullstack Engineer*

JAN 2024 - Present

I collaborate with an incredible team to achieve rapid progress while maintaining high infrastructure, code, and UI/UX quality. Through brief daily meetings and constant communication, we expedite achieve goals for each sprint. The tech stack comprises React, C#, SQL, and AWS.

Advison Development (*Web sports projects*) - *Frontend Engineer*

JAN 2021 - OCT 2023 (2 years, 10 months)

Throughout strategic dynamic team rotations, I assumed responsibilities such as development, code reviews, edge investigations, bug fixing, and AWS cloud solutions, using Agile methodology while following the architecture and programming best practices. I guided and supported team members when they faced roadblocks and shared knowledge with pair-programming. The tech stack comprises React, NodeJS, PHP, and AWS.

Data GIS (*SaaS Real State Geospatial Intelligence*) - *Fullstack Engineer*

DEC 2018 - JAN 2021 (2 years, 2 months)

I collaborated with an interdisciplinary team to create an innovative tool for property appraisers when valuing real estate properties. I played in the full development cycle, from requirements, and post-production improvements. The tech stack comprises React, Javascript, Python, Flask, and MySQL.

Tecnológico de Costa Rica, Costa Rica - *Web Developer & Internship*

JUL 2017 - AUG 2019 (2 years, 2 monts)

Spearheaded the development of an internal web system for Tecnológico de Costa Rica, managing the entire lifecycle from requirements gathering to final delivery, collaborating directly with a governing board. The tech stack comprises ASP.NET, SQL, JQuery, Bootstrap.

Workana (Freelancer platform) - Software Developer

JAN 2017 - DEC 2018 (2 years)

I led the development of a diverse range of software solutions, including desktop applications, mobile apps, and web features. This experience sharpened my communication and negotiation skills with clients, enhancing my ability to deliver high-impact, client-focused results. I concluded my [workana-profile](#) with 15 completed projects rated highest and garnered numerous recommendations.

SKILLS

Top skills: Javascript, React. Work ethic, attention to detail. UX.

Soft Skills: NonVerbal communication, active listening, teamwork, collaboration, leadership, adaptability, problem solving, flexibility, emotional Intelligence, critical thinking, creativity, time management.

- ◆ Listen self-growth audiobooks
- ◆ Crossfit training

LANGUAGES

- ◆ English B2+
- ◆ Spanish native

A Personal Note

Hi there! 🙌 Thank you for taking the time to read through my CV. I also wanted to share that I'm currently expanding my knowledge in web solutions. I'm taking courses about Software Architecture through Udemy. Why? A fullstack developer with these skills can provide more robust solutions that meet high industry standards, and I'm excited to be one of those professionals.
